I just love working with kids! Over the years, I've seen some children that lack the ability and confidence to read. Some parents simply don't have the time to sit with their children, so those children end up falling behind because of this lack of support. But those same children really want to excel academically. This is what inspired me to join the programme: so that I could make a positive impact on a child's career.

It's so motivating to see how driven each child is, and how excited they are to come back for each session! They come to the programme with a smile, knowing they are coming to fun activities which will help them to excel academically.

I've learnt how to communicate so that I can influence a child's ability to learn. I've developed more patience with children that are struggling in school. I've also coordinated the Ready Steady Programme and worked with the staff at our school.
