

## **Yolanda Booyesen**

### **What inspired me to get involved:**

During my years of teaching I discovered how important the role of parents is in the schooling of children. In Wordworks, I have found a programme that is designed to teach, guide and uplift the parent and child.

### **What motivates me to stay involved:**

Every time I run a programme I am encouraged to see how our parents experienced a sense of empowerment and blossom as they discover how to be informed parents. It is just so beautiful to see this session after session.

Wordworks has created a platform to bring the school and the community together in a non-threatening way. Also, Wordworks makes it almost effortless for the facilitator to present. The guide, workbook and resources are well designed.

What I have learnt:

Wordworks is not just an education. It is an experience. An experience of humility and serving my community. I have learnt that we can make a difference and I have witnessed this difference in our children, parents and schools.
